LIBRARIES

Solutions for the respect of the new behavioral rules, letting people use and enjoy the library spaces and services

Finally the libraries reopen, we look forward to being able to return to navigate in this sea of knowledge, immersed in all that human knowledge and creativity have been, and are able to tell.

In the meantime, of course, something has changed, but we know how to adapt, and in order to be able to return to benefit from so many and such opportunities, we can make some small sacrifices.

Designers, graphic designers, product technicians, library experts have worked together developing solutions that, in the most discreet and pleasant way, ensure compliance with the new behavioral rules, while letting people use and enjoy the spaces.

“
the fruit of
our thoughts

”

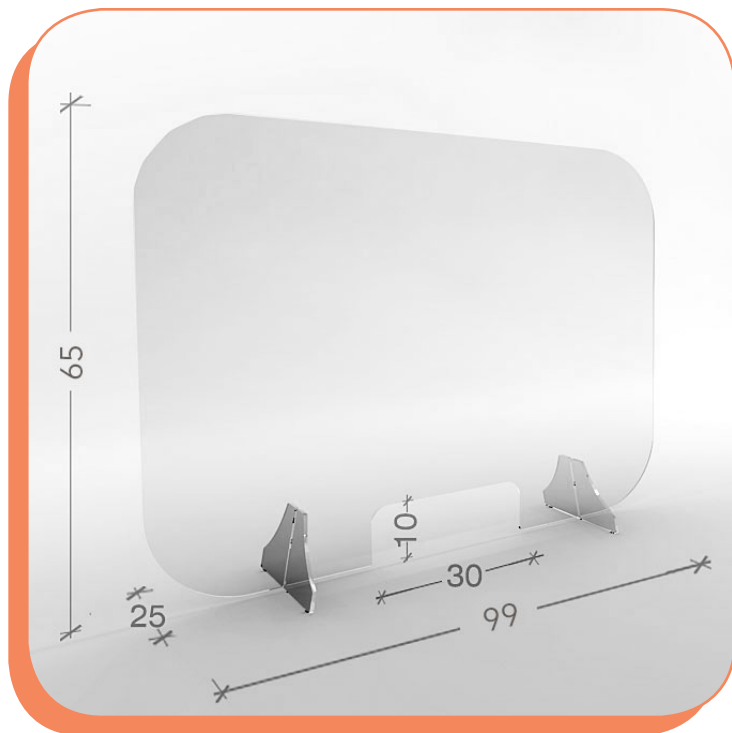

In this document you find the fruit of our thoughts and, although we have not met all possible needs, we want to deal with you, who spend your days in these important spaces, to develop together everything that can be useful and beautiful to your and our safety.

Covid is in the air

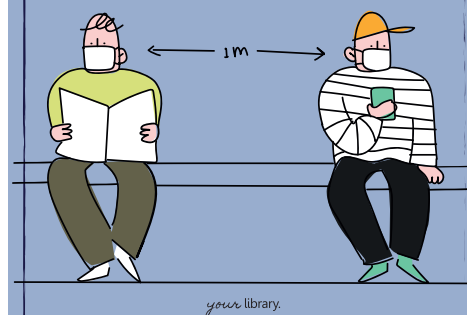

We need **empathy**

*It's true, we can't hug,
but just physically!*

Stay
physically distant

*But don't forget
to keep in touch
with friends and family*

Spread facts,
not fear!

*Fight fake news
and promote a correct
and nonviolent communication*

If you can't go outside,
go inside

Follow a healthy lifestyle
